LIST OF ADD-ON COURSES

1.2.3 Average Percentage of students enrolled in Add-on/Certificate programs as against the total number of students during the last five years

2021-22

Name of Add-on/certificate programs offered	Year	Course Code	Year of offering	No. of times offered during the same year	Duration of course	Number of students enrolled in the year	Number of students completing the course in the year
Certification course on Python Programming	II	CSE19AD	2021 - 22	1	30 HRS	6	6
Certification Courses on LINUX	III	CSE20AD	2021 - 22	1	30 HRS	12	12
Certification course on Salesforce	IV	CSE18AD	2021 - 22	1	30 HRS	12	12

2020-21

Name of Add-on/certificate programs offered	Year	Course Code	Year of offering	No. of times offered during the same year	Duration of course	Number of students enrolled in the year	Number of students completing the course in the year
Certification Courses on LINUX	II	CSE20AD	2020 - 21	1	30 HRS	17	16
Certification course on Salesforce	III	CSE18AD	2020 - 21	1	30 HRS	7	7
Certification course on Python Programming	IV	CSE19AD	2020 - 21	1	30 HRS	7	7

2019-2020

Name of Add-on/certificate programs offered	Year	Course Code	Year of offering	No. of times offered during the same year	Duration of course	Number of students enrolled in the year	Number of students completing the course in the year
Certification course on IoT	II	CSE17AD	2019 - 20	1	30 HRS	17	16
Certification course on Salesforce	III	CSE18AD	2019 - 20	1	30 HRS	7	7
Certification course on Python Programming	IV	CSE19AD	2019 - 20	1	30 HRS	7	7

2018-19

Name of Add-on/certificate programs offered	Year	Course Code	Year of offering	No. of times offered during the same year	Duration of course	Number of students enrolled in the year	Number of students completing the course in the year
Certification course on IoT	II	CSE17AD	2018 - 19	1	30 HRS	8	8
Certification course on Salesforce	III	CSE18AD	2018 - 19	1	30 HRS	6	6

2017-18

Name of Add-on/certificate programs offered	Year	Course Code	Year of offering	No. of times offered during the same year	Duration of course	Number of students enrolled in the year	Number of students completing the course in the year
Certification course on IoT	II	CSE17AD	2017 - 18	1	30 HRS	8	8

About College

VIDARBHA INSTITUTE OF TECHNOLOGY is providing the student community an Opportunity to steep into the competitive world squarely so that they do not find themselves at a great disadvantage mainly owing to weak foundation and inadequate coaching in their formative years. Our teaching staff has been chosen from those who have already spent considerable years in the profession. Every bit of the teaching program would be closely monitored regularly so that we are able to correct the students at the right time. In today's scenario the students population continues to be deprived of quality education even where basic amenities are provided. Several of those passing out of the system are in no way equipped to stand shoulder to shoulder and compete with their more privileged counterparts in National Institutions. We at VIT would strive to reverse this trend and situated close to a rural population would strive to provide the rural population also and opportunity to encourage their children to go in for higher education

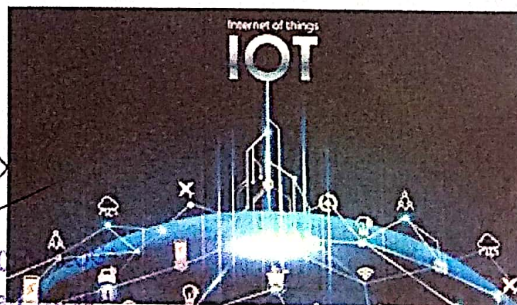

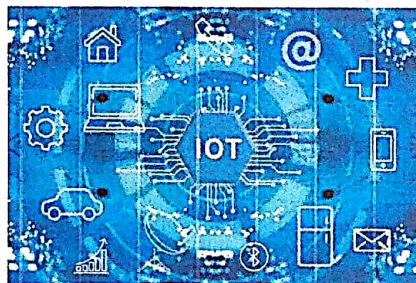

About Add-On-Course

Internet Of Things

IoT is fast catching up the attention of the world. There are many instances where the implementation of IoT is resulting in many benefits and advantages. We are currently in the world of devices, such as Desktop, Laptop, Mobile, Health Bands, etc. All these are interconnected using the Internet, resulting in deriving meaningful and actionable insights to be used for various business beneficial and crucial reasons.

About Add-On-Courses

Salesforce

Salesforce is a cloud-based software company that provides its customers with a platform to develop their own applications without following the tough steps that they used to follow in the legacy system. The software or application once created can be uploaded onto the cloud allowing the end-users to view them.

About Add-On-Course

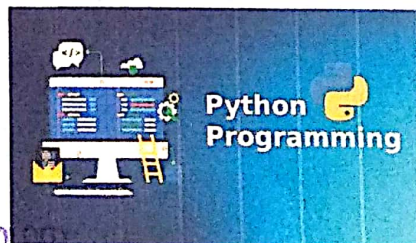

Python Programming

Python is a general-purpose, versatile, and powerful programming language. It's a great first language because it's concise and easy to read. Whatever you want to do, Python can do it. From web development to machine learning to data science, Python is the language for you.

This course is a great introduction to both fundamental programming concepts and the Python programming language. Python 3 is the most up-to-date version of the language with many improvements made to increase the efficiency and simplicity of the Python code that you write.

About Add-On-Course

The Study of Certificate course on Numerical Methods are techniques that used to approximate Mathematical procedures and to give deeper understanding to predict the anomalies which are not possible in the analytical methods. Numerical method finds application in all fields of Engineering and the Physical Sciences, and in the 21st century also the Life and Social Sciences, Medicine, Business and even the Arts.

The Scope of the subject

1. Error analysis
 2. Algebraic and Transcendental Equation
 3. System of Nonlinear Equation.
 4. Ordinary Differential Equation
- Computer Programming

Certificate course on
Numerical Method

30 Hours

Managed by K D M Education Society

**VIDARBHA INSTITUTE OF
TECHNOLOGY, NAGPUR**

Approved by A.I.C.T.E New Delhi, Govt. Of
Maharashtra, Affiliated to DBATU Lonere,
Raigad & RTM Nagpur University, Nagpur

Add-On-Course

On
Numerical Method

Starting From 4 Sept 2017

Organized By
**DEPARTMENT OF BASIC SCIENCE
AND HUMANITIES**

Vidarbha Institute Of Technology

Nagpur

PRINCIPAL

VIDARBHA INSTITUTE OF TECHNOLOGY
Uti (Bhiwapur), Umrer Road, Nagpur

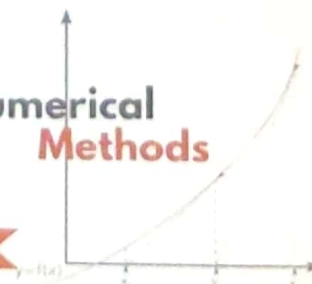

About College

VIDARBHA INSTITUTE OF TECHNOLOGY is providing the student community an Opportunity to steep into the competitive world squarely so that they do not find themselves at a great disadvantage mainly owing to weak foundation and inadequate coaching in their formative years. Our teaching staff has been chosen from those who have already spent considerable year in the profession. Every bit of the teaching program would be closely monitored regularly so that we are able to correct the students at the right time. In today's scenario the students population continues to be deprived of quality education even where basic amenities are provided. Several of those passing out of the system are in no way equipped to stand shoulder to shoulder and compete with their more privileged counterparts in National Institutions. We at VIT would strive to reverse this trend and situated close to a rural population would strive to provide the rural population also and opportunity to encourage their children to go in for higher education

We at VIT would strive to reverse this trend and situated close to a rural population would strive to provide the rural population also and opportunity to encourage their children to go in for higher education

About Add-On-Course

The word Nanoscience refers to the study, manipulation and engineering of matter, particles and structures on the nanometer scale (one millionth of a millimeter, the scale of atoms and molecules). Important properties of materials, such as the electrical, optical, thermal and mechanical properties, are determined by the way molecules and atoms assemble on the nanoscale into larger structures. Moreover, in nanometer size structures these properties often differ from those on macroscale, because quantum mechanical effects become important.

Nano technology is the application of nano science leading to the use of new nano materials and nano size components in useful products. Nano technology will eventually provide us with the ability to design custom-made materials and products with new enhanced properties, new nano electronics components, new types of "smart" medicines and sensors, and even interfaces between electronics and biological systems. These newborn scientific disciplines are situated at the interface between physics, chemistry, materials science, microelectronics, biochemistry, and biotechnology. Control of these disciplines therefore requires an academic and multi disciplinary scientific education

Certificate course on
Nano Science and Nano
Technology

30 Hours

Managed by K D M Education Society

**VIDARBHA INSTITUTE OF
TECHNOLOGY, NAGPUR**

Approved by A.I.C.T.E New Delhi, Govt. Of
Maharashtra, Affiliated to DBATU Lonere,
Raigad & RTM Nagpur University, Nagpur

Add-On-Course

On
Nano science and Nano Technology

Starting From 3 Feb 2018

Organized By
**DEPARTMENT OF BASIC SCIENCE
AND HUMANITIES**

Vidarbha Institute Of Technology

Nagpur

Principal

VIDARBHA INSTITUTE OF TECHNOLOGY
Uti (Bhiwapur), Umrer Road, Nagpur

CHIEF PATRONS

Hon'ble
Shri Jitesh Maheshwari

Director, Vidarbha Institute of technology

Dr. S. S. Uttarwar
Principal, VIT Nagpur

Dr. Akshad Vaidya
HOD, First Year, VIT Nagpur

Dr. Akshad Vaidya
Course Co-ordinator

About College

VIDARBHA INSTITUTE OF TECHNOLOGY is providing the student community an Opportunity to steep into the competitive world squarely so that they do not find themselves at a great disadvantage mainly owing to weak foundation and inadequate coaching in their formative years. Our teaching staff has been chosen from those who have already spent considerable years in the profession. Every bit of the teaching program would be closely monitored regularly so that we are able to correct the students at the right time. In today's scenario the students population continues to be deprived of quality education even where basic amenities are provided. Several of those passing out of the system are in no way equipped to stand shoulder to shoulder and compete with their more privileged counterparts in National Institutions. We at VIT would strive to reverse this trend and situated close to a rural population would strive to provide the rural population also and opportunity to encourage their children to go in for higher education

About Add-On-Courses

The study of certificate course on Chemical Safety and Handling of Hazardous Chemicals offers to know about Industrial safety programs and toxicology, Industrial laws, regulations and source models, it further helps to understand about fire and explosion, preventive methods, relief and its sizing methods, analyse industrial Hazards & its risk assessment.

Course Outcomes:

By the end of the course the students will be able to

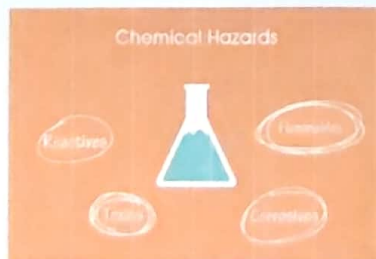

1. Analyze the effect of release of toxic substances
2. Understand the industrial laws, regulations and source models.
3. Apply the methods of prevention of fire and explosions.
4. Understand the relief and its sizing methods.
5. Understand the methods of hazard identification, preventive measures and its handling

The scope of the subject

- 1 Introduction
- 2 Toxicology
- 3 Industrial Hygiene
- 4 Fires and Explosions
- 5 Introduction to Reliefs
- 6 Hazards Identification
- 7 Risk Assessment

Certificate course on
Chemical Safety &
Handling of hazardous Chemical

30 Hours

Managed by K D M Education Society

About College

VIDARBHA INSTITUTE OF TECHNOLOGY is providing the student community an Opportunity to steep into the competitive world squarely so that they do not find themselves at a great disadvantage mainly owing to weak foundation and inadequate coaching in their formative years. Our teaching staff has been chosen from those who have already agent considerable year in the profession. Every bit of the teaching program would be closely monitored regularly so that we are able to correct the students at the right time. In today's scenario the students population continues to be deprived of quality education even where basic amenities are provided. Several of those passing out of the system are in no way equipped to stand shoulder to shoulder and compete with their more privileged counterparts in National Institutions. We are at VIT would strive to reverse this trend and situated close to a rural population would strive to provide the rural population also and opportunity to encourage their children to go in for higher education.

About Add-On-Course

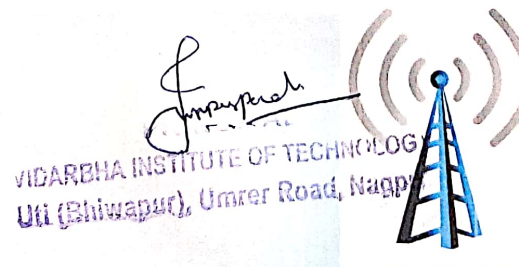

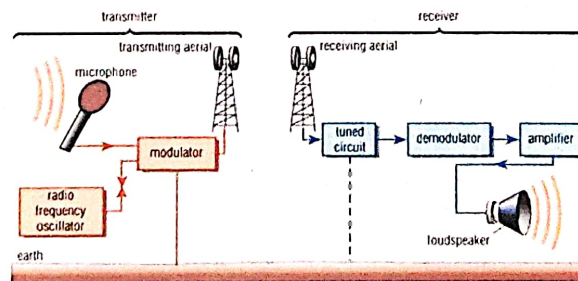

Communication System

Secure, reliable, high-speed wireless communications are critical to the economic and national competitiveness of the United States. Advanced communications are enabling dramatic changes in how consumers, manufacturers, governments, and others provide and consume information, transact business, provide and essential services, and shop, among other tasks. An analysis by Accenture predicts that by 2022 there will be approximately 29 billion connected devices globally, 500 million of which will be connected to 5G wireless networks. This insatiable societal demand for connectivity will require significant advancements in communication technologies.

An analog communication system is a communication system where the information signal sent from point A to point B can only be described as an analog signal. An example of this is Monica speaking to Carl over the telephone. A continuous time varying signal, which represents a time varying quantity can be termed as an Analog Signal.

About Add-On-Course

Introduction To SCILAB

Scilab is an engineering tool. You can do a lot of things with it. It is capable of numerical computations, data analysis and plotting, system modeling and simulation, has graphical user interface capabilities and many many more. From the programming language point of view Scilab is an interpreted language. It contains a lot of already defined functions that can be used to resolve engineering and scientific problems. If we look at the license type, Scilab is an open source software. Its source code can be downloaded, modified and compiled in order to give you the answer to your needs. Fourth definition of Scilab: it is like Matlab®. From a Matlab user point of view Scilab is very easy to learn. There are a lot of functions that are similar and that can be used in the same way, for the same purpose. Scilab source code is written in C and Fortran. For the graphical user interface Scilab used Tcl/Tk for versions prior to 5.x and Java for the newer versions.

About Add-On-Course**Digital Image & Speech Processing**

Digital image processing deals with manipulation of digital images through a digital computer. It is a subfield of signals and systems but focus particularly on images. DIP focuses on developing a computer system that is able to perform processing on an image. The input of that system is a digital image and the system process that image using efficient algorithms, and gives an image as an output. The most common example is Adobe Photoshop. It is one of the widely used application for processing digital images

About Add-On-Course

Basics Of Antenna

A person, who needs to convey a thought, an idea or a doubt, can do so by voice communication. Two individuals communicating with each other. Here, communication takes place through sound waves. However, if two people want to communicate who are at longer distances, then we have to convert these sound waves into electromagnetic waves. The device, which converts the required information signal into electromagnetic waves, is known as an Antenna.

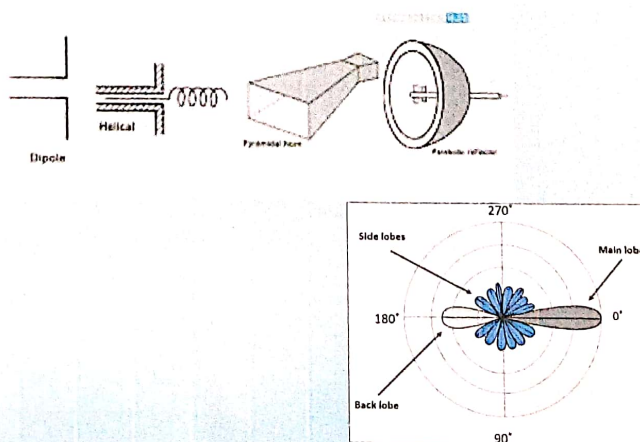

An Antenna can be used either as a transmitting antenna or a receiving antenna. A transmitting antenna is one, which converts electrical signals into electromagnetic waves and radiates them. A receiving antenna is one, which converts electromagnetic waves from the received beam into electrical signals. In two-way communication, the same antenna can be used for both transmission and reception.

ABOUT COLLEGE

VIDARBHA INSTITUTE OF TECHNOLOGY is providing the student community an Opportunity to steep into the competitive world squarely so that they do not find themselves at great disadvantage mainly owing to weak foundation and inadequate coaching in their formative year. Our teaching staff has been chosen from those who have already agent considerable year in the profession. Every bit of the teaching program would be closely monitored regularly so that we are able to correct student at the right time. In today's scenario the students population continues to be deprived of quality education even where basic amenities are provided. Several of those passing out of the system are in no way equipped to stand shoulder to shoulder and compete with their more privileged counterparts in National Institutions. We are at VIT would strive to reverse this trend and situated close to a rural population also and opportunity to encourage their children to go in for higher education

ABOUT ADD-ON- COURSE

The study of certificate course on "Installation Maintenance & Repair of electrical equipments, Control of electric machines, Industrial Control" offers to know about The 'Electrical Equipment Repair and Maintenance course is a study of electrical equipment, the procedures, and principles associated with the techniques of repair and maintenance.

Course Outcomes:

The objective of the course is: To develop a comprehensive technological understanding in Substation Equipment. To provide in-depth understanding about Protection and Safety to help this course will empower the students with the necessary knowledge of operations and maintenance of substation equipment

The Scope of the subject :

- Substations are designed to accomplish the following functions.
- Although not all substations have all these functions: Change voltage from one level to another.
- Regulate voltage to compensate for system voltage changes.
- Switch transmission and distribution circuits into and out of the grid system.

ABOUT COLLEGE

VIDARBHA INSTITUTE OF TECHNOLOGY is providing the student community an Opportunity to steep into the competitive world squarely so that they do not find themselves at great disadvantage mainly owing to weak foundation and inadequate coaching in their formative year. Our teaching staff has been chosen from those who have already spent considerable year in the profession. Every bit of the teaching program would be closely monitored regularly so that we are able to correct student at the right time. In today's scenario the students population continues to be deprived of quality education even where basic amenities are provided. Several of those passing out of the system are in no way equipped to stand shoulder to shoulder and compete with their more privileged counterparts in National Institutions. We are at VIT would strive to reverse this trend and situated close to a rural population also and opportunity to encourage their children to go in for higher education

ABOUT ADD-ON- COURSE

The work practices to be used during the operation and maintenance of electric power generation, transmission, and distribution facilities. The standard includes requirements relating to enclosed spaces, hazardous energy control, working near energized parts, grounding for employee protection, work on underground and overhead installations, line-clearance tree trimming, work in substations and generating plants, and other special conditions and equipment unique to the generation, transmission, and distribution of electric energy. Compliance with these requirements will prevent injuries to employees working on electric power systems.

Course Outcomes:

The general industry standard for foot protection. This standard applies to employers performing work on electric power generation, transmission, and distribution installations, as well as employers in other industries. The final rule removes the requirement for employees to wear protective footwear as protection against electric shock.

The Scope of the subject :

- Technicians and engineers that work in electrical power sectors like generation, distribution or transmission of electric and also industrial areas.
- Electrical engineering students.
- Anyone who wants to learn about electrical power engineering.

We are at VIT would strive to reverse this trend and situated close to a rural population also and opportunity to encourage their children to go in for higher education

ABOUT ADD-ON- COURSE

The study of certificate course on "Introduction to Smart Cities Concept" offers to know about A smart city is a municipality that uses information and communication technologies (ICT) to increase operational efficiency, share information with the public and improve both the quality of government services and citizen welfare.

Course Outcomes:

The aim of the course is to study the concepts and principles of urban and regional planning. The course deals about the aim, objectives and scope of town planning. The Course comprises of different types of plan and discusses different categories of land use. In other words, course provides comprehensive knowledge to the students about various fields of urban and regional planning and related norms, regulation and standards for spatial development.

The Scope of the subject :

- City districts are increasingly becoming "urban villages" that meet the residents' desire for identity and a local lifestyle.
- Their inhabitants must rely on infrastructure and buildings that are built towards sustainability just as much as towards people-oriented transport and mobility, efficient city management, and safety and security.
- Smart, digital technologies provide the key to creating livable, adaptable, accessible, and sustainable urban communities and buildings.

Several of those passing out of the system are in no way equipped to stand shoulder to shoulder and compete with their more privileged counterparts in National Institutions. We are at VIT would strive to reverse this trend and situated close to a rural population also and opportunity to encourage their children to go in for higher education

ABOUT ADD-ON- COURSE

The study of certificate course on Solar PV system Design and Installation at roof top to partial fulfillment of Elevator and common load offers to know about the main concerns for the rising future of any nation. Energy certainly plays a vital role in development and welfare of human being. There exists a direct correlation between the development of a country and its consumption of energy.

Course Outcomes:

The objective of the course is: To develop a comprehensive technological understanding in solar PV system components. To provide in-depth understanding of design parameters to help design and simulate the performance of a solar PV power plant To pertain knowledge about planning, project implementation and operation of solar PV power generation.

The Scope of the subject :

- A minimum Solar PV System Design and Installation at Roof Top session
- Development of Renewable Energy is one of the important strategies adopted as part of Fuel Diversification Program

About Department

Mechanical Engineering is a diverse subject that derive its breadth from the need to design and manufacturing everything from small individual parts and device to large system. The role of mechanical engineer is to take a product from an idea to the marketplace.

About Add-on Course

The Certificate course on Python Programming Language, the computer technology to design, analyze and perform experiments on real life problems in mechanical engineering using python.

Outcome

- Demonstrate understand of basic concepts of python programming.
- Identify, install and utilize python packages
- Develop and execute python programs for specific applications.
- Develop and build python program to solve real-world engineering problems
- Prepare a report on case studies selected.

Scope of the Course

- Introduction to python and its applications
- Basic Coding in Python
- Python libraries: Installing of different libraries, packages or modules.
- Case Studies using Python

ABOUT COLLEGE

VIDARBHA INSTITUTE OF TECHNOLOGY is providing the student community an Opportunity to step into the competitive world squarely so that they do not find themselves at great disadvantage mainly owing to weak foundation and inadequate coaching in their formative year. Our teaching staff has been chosen from those who have already agent considerable year in the profession. Every bit of the teaching program would be closely monitored regularly so that we are able to correct student at the right time. In today's scenario the student's population continues to be deprived of quality education even where basic amenities are provided. Several of those passing out of the system are in no way equipped to stand shoulder to shoulder and compete with their more privileged counterparts in National Institutions. We are at VIT would strive to reverse this trend and situated close to a rural population also an opportunity to encourage their children to go in for higher education.

Name of Course
Certificate Course on
Python Programming Language

Duration
30 Hrs

Managed by K.D.M. Education Society

VIDARBHA INSTITUTE OF TECHNOLOGY

Uti, Umrer Road-441209, [Tel:07116-281155/56](tel:07116-281155/56) Fax:07116-281154

E-mail id:kdmcommunity@gmail.com, Website:www.vitnagpur.com

Approved by A.I.C.T.E., New Delhi, Govt. Of Maharashtra & Affiliated to DBATU Lonere, Raigad & RTM Nagpur University, Nagpur

CERTIFICATE

Mr/Ms Sanket Dhananjay Yeole B.E./B.TECH IIIrd year

Of Mechanical Engineering Department has Enrolled & successfully completed

Add-On Course on Python Programming Language

during 05/01/2021 to 24/02/2022 with Grade A Organized by Mechanical Engineering Department

About Department

Mechanical Engineering is a diverse subject that derive its breadth from the need to design and manufacturing everything from small individual parts and device to large system. The role of mechanical engineer is to take a product from an idea to the marketplace

About Add-on Course

The Certificate course on industrial pneumatics and Hydraulics, with an understanding of the construction and function of pneumatic components used in automation. Provide the skills and knowledge of electric components as well as to develop an ability to read, design and construct simple electro-pneumatic controls.

Outcome

- Understanding operating principles and constructional features of hydraulic and pneumatic systems.
- Knowledge with the selection of hydraulic/ pneumatic components.
- Understanding of designing and layout of Hydraulic power package and trouble shooting.

Scope of the Course

- Characteristics of Hydraulic and pneumatic systems.
- Construction and principle of working elements.
- Compressed air preparation.
- Characteristics of Electro-pneumatic systems.

About Department

Mechanical Engineering is a diverse subject that derive its breadth from the need to design and manufacturing everything from small individual parts and device to large system. The role of mechanical engineer is to take a product from an idea to the marketplace.

About Add-on Course

The Certificate course on Electric Vehicles, with an understanding the need and scope of Electric Vehicles. To study the various components of electric vehicles. To learn Powertrain Sizing calculations. To get introduced with the modern trends, new technologies and standard practices followed in the industry right now.

Outcome

- Selection of E – motors for Electric Vehicles- BLDC/PMSM/INDUCTION/SynR MOTORS
- Lithium Batteries and Battery Pack Design for Electric & Hybrid Vehicle Application
- Lithium Ion Battery Management Systems
- Powertrain Sizing Calculation Procedure and Practice Problems
- Case Study on Nissan Leaf electric vehicle.

Scope of the Course

- Customer needs, why they prefer EV Vehicles
- Complete Overview of all H-V components involved in an electric or hybrid Vehicle.
- Define and analyze battery operation and performance requirements for HEV, PHEV, EREV & electric vehicle applications
- Define key vehicle system requirements and select and size system

ABOUT COLLEGE

VIDARBHA INSTITUTE OF TECHNOLOGY is providing the student community an Opportunity to step into the competitive world squarely so that they do not find themselves at great disadvantage mainly owing to weak foundation and inadequate coaching in their formative year. Our teaching staff has been chosen from those who have already agent considerable year in the profession. Every bit of the teaching program would be closely monitored regularly so that we are able to correct student at the right time. In today's scenario the student's population continues to be deprived of quality education even where basic amenities are provided. Several of those passing out of the system are in no way equipped to stand shoulder to shoulder and compete with their more privileged counterparts in National Institutions. We are at VIT would strive to reverse this trend and situated close to a rural population also an opportunity to encourage their children to go in for higher education.

About Department

Mechanical Engineering is a diverse subject that derive its breadth from the need to design and manufacturing everything from small individual parts and device to large system. The role of mechanical engineer is to take a product from an idea to the marketplace.

About Add-on Course

The Certificate course on Python Programming Language, the computer technology to design, analyze and perform experiments on real life problems in mechanical engineering using python.

Outcome

- Demonstrate understand of basic concepts of python programming.
- Identify, install and utilize python packages
- Develop and execute python programs for specific applications.
- Develop and build python program to solve real-world engineering problems
- Prepare a report on case studies selected.

Scope of the Course

- Introduction to python and its applications
- Basic Coding in Python
- Python libraries: Installing of different libraries, packages or modules.
- Case Studies using Python

About Department

Mechanical Engineering is a diverse subject that derive its breadth from the need to design and manufacturing everything from small individual parts and device to large system. The role of mechanical engineer is to take a product from an idea to the marketplace.

About Add-on Course

The Certificate course on Industrial Automation and Program Logical Unit, with an understanding the need and justification of automation. To study the design of pneumatic and hydraulic circuits. To study and understand electro-pneumatic circuits and PLC Design To familiarize with robotic systems in automated manufacturing processes.

Outcome

- Demonstrate understanding of fundamentals of industrial automation and PLC.
- Design & develop pneumatic / hydraulic circuits.
- Design and develop electro-pneumatic circuits and PLC ladder logics.
- Demonstrate understanding of robotic control systems and their applications

Scope of the Course

- Introduction to Automation Definition and fundamentals of automation,
- Design of Pneumatic Circuits, Design of Hydraulic Circuits Basic
- Electro-pneumatic Circuits Design of Electro-Pneumatic Circuits using single solenoid and double solenoid valves; design factories automation from a to z

ABOUT COLLEGE

VIDARBHA INSTITUTE OF TECHNOLOGY is providing the student community an Opportunity to step into the competitive world squarely so that they do not find themselves at great disadvantage mainly owing to weak foundation and inadequate coaching in their formative year. Our teaching staff has been chosen from those who have already agent considerable year in the profession. Every bit of the teaching program would be closely monitored regularly so that we are able to correct student at the right time. In today's scenario the student's population continues to be deprived of quality education even where basic amenities are provided. Several of those passing out of the system are in no way equipped to stand shoulder to shoulder and compete with their more privileged counterparts in National Institutions. We are at VIT would strive to reverse this trend and situated close to a rural population also an opportunity to encourage their children to go in for higher education.

About Department

Mechanical Engineering is a diverse subject that derive its breadth from the need to design and manufacturing everything from small individual parts and device to large system. The role of mechanical engineer is to take a product from an idea to the marketplace.

About Add-on Course

The Certificate course on Electric Vehicles, with an understanding the need and scope of Electric Vehicles. To study the various components of electric vehicles. To learn Powertrain Sizing calculations. To get introduced with the modern trends, new technologies and standard practices followed in the industry right now.

Outcome

- Selection of E – motors for Electric Vehicles- BLDC/PMSM/INDUCTION/SynR MOTORS
- Lithium Batteries and Battery Pack Design for Electric & Hybrid Vehicle Application
- Lithium Ion Battery Management Systems
- Powertrain Sizing Calculation Procedure and Practice Problems
- Case Study on Nissan Leaf electric vehicle.

Scope of the Course

- Customer needs, why they prefer EV Vehicles
- Complete Overview of all H-V components involved in an electric or hybrid Vehicle.
- Define and analyze battery operation and performance requirements for HEV, PHEV, EREV & electric vehicle applications
- Define key vehicle system requirements and select and size system

About Department

Mechanical Engineering is a diverse subject That derives its breadth from the need to design and manufacturing everything from small individual parts and device to large system. The role of mechanical engineer is to take a product from an idea to the marketplace.

About Add-on Course

The certificate Course on Computerized Numerical Control Machines the Computer Technology allows for the design and production of intricate specialty parts.CNC machinist have access to a number of innovative machining techniques that let them produce even the most complex parts.

Outcome:

- Program basic parts on a CNC machine
- Have a General understanding of Machine Programming principal.
- Be able to read FANUC Programs.
- Machine their own parts using CNC Routers and Milling Machine.
- Program any shape using G-code
- By the end of this course Student will be able to Read, Edit and hand -write basic G- code programs for 3 axis CNC mills.

Scope of Course:

- Introduction to CNC programming
- Cartesian co-ordinate system.
- Programming profile and Machining Slots
- Case study

About Department

Mechanical Engineering is a diverse subject that derive its breadth from the need to design and manufacturing everything from small individual parts and device to large system. The role of mechanical engineer is to take a product from an idea to the marketplace.

About Add-on Course

The Certificate course on Industrial Automation and Program Logical Unit, with an understanding the need and justification of automation. To study the design of pneumatic and hydraulic circuits. To study and understand electro-pneumatic circuits and PLC Design To familiarize with robotic systems in automated manufacturing processes.

Outcome

- Demonstrate understanding of fundamentals of industrial automation and PLC.
- Design & develop pneumatic / hydraulic circuits.
- Design and develop electro-pneumatic circuits and PLC ladder logics.
- Demonstrate understanding of robotic control systems and their applications

Scope of the Course

- Introduction to Automation Definition and fundamentals of automation,
- Design of Pneumatic Circuits, Design of Hydraulic Circuits Basic
- Electro-pneumatic Circuits Design of Electro-Pneumatic Circuits using single solenoid and double solenoid valves; design factories automation from a to z

ABOUT COLLEGE

VIDARBHA INSTITUTE OF TECHNOLOGY is providing the student community an Opportunity to step into the competitive world squarely so that they do not find themselves at great disadvantage mainly owing to weak foundation and inadequate coaching in their formative year. Our teaching staff has been chosen from those who have already agent considerable year in the profession. Every bit of the teaching program would be closely monitored regularly so that we are able to correct student at the right time. In today's scenario the student's population continues to be deprived of quality education even where basic amenities are provided. Several of those passing out of the system are in no way equipped to stand shoulder to shoulder and compete with their more privileged counterparts in National Institutions. We are at VIT would strive to reverse this trend and situated close to a rural population also an opportunity to encourage their children to go in for higher education.

About Department

Mechanical Engineering is a diverse subject that derive its breadth from the need to design and manufacturing everything from small individual parts and device to large system. The role of mechanical engineer is to take a product from an idea to the marketplace.

About Add-on Course

The Certificate course on Electric Vehicles, with an understanding the need and scope of Electric Vehicles. To study the various components of electric vehicles. To learn Powertrain Sizing calculations. To get introduced with the modern trends, new technologies and standard practices followed in the industry right now.

Outcome

- Selection of E – motors for Electric Vehicles- BLDC/PMSM/INDUCTION/SynR MOTORS
- Lithium Batteries and Battery Pack Design for Electric & Hybrid Vehicle Application
- Lithium Ion Battery Management Systems
- Powertrain Sizing Calculation Procedure and Practice Problems
- Case Study on Nissan Leaf electric vehicle.

Scope of the Course

- Customer needs, why they prefer EV Vehicles
- Complete Overview of all H-V components involved in an electric or hybrid Vehicle.
- Define and analyze battery operation and performance requirements for HEV, PHEV, EREV & electric vehicle applications
- Define key vehicle system requirements and select and size system

About Department

Mechanical Engineering is a diverse subject That derives its breadth from the need to design and manufacturing everything from small individual parts and device to large system. The role of mechanical engineer is to take a product from an idea to the marketplace.

About Add-on Course

The certificate Course on Computerized Numerical Control Machines the Computer Technology allows for the design and production of intricate specialty parts.CNC machinist have access to a number of innovative machining techniques that let them produce even the most complex parts.

Outcome:

- Program basic parts on a CNC machine
- Have a General understanding of Machine Programming principal.
- Be able to read FANUC Programs.
- Machine their own parts using CNC Routers and Milling Machine.
- Program any shape using G-code
- By the end of this course Student will be able to Read, Edit and hand -write basic G- code programs for 3 axis CNC m ills.

Scope of Course:

- Introduction to CNC programming
- Cartesian co-ordinate system.
- Programming profile and Machining Slots
- Case study

About Department

Mechanical Engineering is a diverse subject that derive its breadth from the need to design and manufacturing everything from small individual parts and device to large system. The role of mechanical engineer is to take a product from an idea to the marketplace.

About Add-on Course

The Certificate course on Industrial Automation and Program Logical Unit, with an understanding the need and justification of automation. To study the design of pneumatic and hydraulic circuits. To study and understand electro-pneumatic circuits and PLC Design To familiarize with robotic systems in automated manufacturing processes.

Outcome

- Demonstrate understanding of fundamentals of industrial automation and PLC.
- Design & develop pneumatic / hydraulic circuits.
- Design and develop electro-pneumatic circuits and PLC ladder logics.
- Demonstrate understanding of robotic control systems and their applications

Scope of the Course

- Introduction to Automation Definition and fundamentals of automation,
- Design of Pneumatic Circuits, Design of Hydraulic Circuits Basic
- Electro-pneumatic Circuits Design of Electro-Pneumatic Circuits using single solenoid and double solenoid valves;
design factories automation from a to z

ABOUT COLLEGE

VIDARBHA INSTITUTE OF TECHNOLOGY is providing the student community an Opportunity to step into the competitive world squarely so that they do not find themselves at great disadvantage mainly owing to weak foundation and inadequate coaching in their formative year. Our teaching staff has been chosen from those who have already agent considerable year in the profession. Every bit of the teaching program would be closely monitored regularly so that we are able to correct student at the right time. In today's scenario the student's population continues to be deprived of quality education even where basic amenities are provided. Several of those passing out of the system are in no way equipped to stand shoulder to shoulder and compete with their more privileged counterparts in National Institutions. We are at VIT would strive to reverse this trend and situated close to a rural population also an opportunity to encourage their children to go in for higher education.

About Department

Mechanical Engineering is a diverse subject That derives its breadth from the need to design and manufacturing everything from small individual parts and device to large system. The role of mechanical engineer is to take a product from an idea to the marketplace.

About Add-on Course

The certificate Course on Computerized Numerical Control Machines the Computer Technology allows for the design and production of intricate specialty parts.CNC machinist have access to a number of innovative machining techniques that let them produce even the most complex parts.

Outcome:

- Program basic parts on a CNC machine
- Have a General understanding of Machine Programming principal.
- Be able to read FANUC Programs.
- Machine their own parts using CNC Routers and Milling Machine.
- Program any shape using G-code
- By the end of this course Student will be able to Read, Edit and hand -write basic G- code programs for 3 axis CNC m ills.

Scope of Course:

- Introduction to CNC programming
- Cartesian co-ordinate system.
- Programming profile and Machining Slots
- Case study
